

## WSPA's Concepts in Animal Welfare (CAW)

A high level of competency in animal welfare is increasingly required by companies, governments and others who employ veterinarians. Vets who have the skills and knowledge to look after animals well are therefore likely to have better employment opportunities, particularly with international companies and organisations.

The 3rd edition of the Concepts in Animal Welfare syllabus is for anyone who teaches animal welfare science at tertiary level, including undergraduate, post-graduate and professional development courses.

It includes 35 modules covering

- An overview of animal welfare science, ethics and law
- Measurement and assessment of welfare in industry and home
- Disease, environmental enrichment, humane slaughter
- Animal welfare in the economy, society and religion,
- Caring for animals in conflict and disasters
- Animal welfare organisations
- The role of vets in animal welfare

The materials have been welcomed by the World Organisation for Animal Health (OIE), World Veterinary Association (WVA), Federation of Veterinarians of Europe (FVE) and others.

The CAW syllabus was first created in 2003 by the University of Bristol School of Veterinary Science (UK) in a partnership with the World Society for the Protection of Animals. It was updated in 2007 and 2013, with new modules and more advanced materials to enhance the student experience.

The resource is supported by the [CAW Toolbox](#) of on-line resources for animal welfare teaching. We welcome your feedback on using this resource as a teaching tool through our online evaluation tool [here](#).

The Concepts in Animal Welfare syllabus is also available online via the [Animal Mosaic](#) website

### Use of WSPA's Concepts in Animal Welfare by universities, colleges and institutes

Over the past 10 years WSPA has provided CAW materials to deans and teaching staff in over 400 academic institutions worldwide. In several countries of Africa, Asia and Latin America, as well as China, WSPA veterinarians have also trained teachers to use the materials and identified faculty members as 'Animal Welfare Champions' in their area.

The following is an incomplete list of institutions where the materials are being used by teachers.
