Public Health in Ruminants

13 – 26 March, 2018

About Galilee International Management Institute

Galilee International Management Institute has 30 years’ experience of delivering advanced capacity building courses to professionals from all over the world. Professionals in both the public and private sectors learn how to think differently. We encourage them to envision and dare to implement change in ways unimagined before, in ways that may, in fact, be more practical and cost effective considering the resources at hand. Our programmes present experience acquired over the years in Israel, a country world renowned for its innovative approaches, rapid development and esprit de corps.

Programme Introduction

Israel is renowned for its dairy cows and their high milk production, despite a harsh climate and limited resources. One of the pillars of this achievement is advanced veterinary care. Israel has intensive clinical veterinary services for individual animals and herd management. We aim to share this knowledge with all those professionally involved in the care of ruminants.

Target Group

This programme is designed for Veterinarians

Programme Structure

The programme is of 14 days duration. The daily schedule is comprised of approximately 8 academic hours a day, six days a week, including field exercises and study tours, with a total of 96 study hours.
